Table Tipping is the physical and spiritual phenomenon that occurs when people sit around a table placing their fingertips very lightly on its surface with the singular concentration to connect with spiritual energies for the purpose of interdimensional communication.

This type of table tipping is done not only by the Kents; the participants also become part of the phenomena by sitting at one of the Kents' tables or at a table brought by the participants. These sessions can be quite intense and memorable! Call or email to reserve a spot!

Fees for the workshop:

Non-church members \$40.00	SCOL members \$25.00
