**Saturday,
November 21, 2015**

10:00–5:00 PM

with an hour break for lunch

120 Plant Ave., Hauppauge, NY

In this workshop, learn all about **SCRYING**.
Scrying has been used as an *intuitive method of focus* since ancient times.

All levels are welcome from Beginner to Beyond!

Materials for this class will be provided.

“Scrying” means to perceive psychic visions on clear, shiny surfaces that relate to the masses or to individual questions. Surfaces from **clear crystal**, **clear water**, **polished mirrors**, **shiny black ink**, or **polished stainless steel** are effective.

The material used for scrying must be placed so the light strikes it an an angle; the question is asked, then the person who is scrying stares at the surface with a neutral mind. The vision begins with a white cloud, which lifts to reveal a scene, words or a face.

Please be advised that the views and opinions expressed in this workshop ate those of Rev. Sharon Suibis and do not necessarily reflect the views and opinions of NSAC.
